

## INSTALLATION INSTRUCTIONS PART 1801 GL1800 ADJUSTABLE WINGLETS

Note: Read instruction thoroughly before installing. Drilling required.

1. Place bike on center stand.
2. Place winglet with hinges flat on the face of the windshield and align to follow the contour of the windshield.

Note: The position can be hard against the windshield for a smother look or leave a 1/4" to 3/8" space between winglet and windshield which will allow a little air to come through when you turn the winglets outward.

3. Mark holes for drilling with masking tape and pencil. Drill with a .140 drill. Use a spacer block on the drill bit for drilling an acrylic windshield.
4. Install winglets using nuts, bolts and washer from the windshield side into the hinges.
5. To adjust friction, tighten hinge bolts for a firm movement. CAUTION: Very little tighten is required. Hinges have a lot of friction surfaces, do not over tighten.
